YEAR	RESEARCH PROJECTS
2016	Swedish Defense University: Group development and leadership in multicultural settings. A Literature overview over 8 years Group Development Research in order to create an updated theoretical framework for the leadership program UGL – Understanding Groups and Leaders. The study was lead by <u>Max Rapp Ricciardi</u> in collaboration with the Swedish Defense University who also financed the study.
2016	Project Leadership and Culture within VCC R&D Inquiry: A study conducted at Volvo Car Corporation that regards Project Leadership qualities in innovation environments. Personality dimensions such as PANAS, Dark Triad, PL leadership style etc. were analyzed. The study was based on a web-based questionnaire. The study was designed and led by <u>Max Rapp Ricciardi</u> in collaboration with the Royal Institute of Technology and Volvo Car Corporation.
2015 – 2016	Personality and health among Swedish Priests. The Swedish Church is passing through a number of reforms which have exposed the priests to severe stress. The study focused to identify motivators, coping strategies, PANAS. The study was designed and led by <u>Max Rapp Ricciardi</u> .
2015-2016	Personality Characteristics among International Students at Chalmers University of Entrepreneurship: Within psychological research it has long been claimed that entrepreneurs have some typical dimensions in their personalities, such as compensatory needs, inner locus of control and sometimes dark traits such as narcissism and counter dependent tendencies and suspicion against authorities. From this theoretical perspective it becomes a paradox that university structures provides special training to Entrepreneur studies, since the traditional entrepreneur would most probably discard such structures. The study focused on understanding the driving forces and personalities of students applying to the Chalmers School of Entrepreneurship. This is made by the distribution of a yearly questionnaire to the applicants which measures personality dimensions and motivators. The study is designed and led by <u>Max Rapp Ricciardi</u> in collaboration with Chalmers School of Entrepreneurship and Blekinge Kompetenscenter.
2014	Personality Characteristics among Professional UGL Trainers Certified by the Swedish Defense University: UGL is one of the most popular leadership courses that has it's origins in the military, but found it's way to the civilian market. It is a five day program, and builds on experienced based learning. Even though the concept existed in Sweden and thousands of people followed the program, no scientific research has been done on the effects of the program. One issue that this research project addressed was the importance of the Personality Characteristics of Professional UGL trainers. The study was designed and led by <u>Max Rapp Ricciardi</u> and conducted in collaboration with the Swedish Defense University and Blekinge Kompetenscenter.
2012-2013	Knowledge Exchange Through Leadership in a Multi-Cultural Business Environment: A Pilot Research at Volvo Group. The study was a joint venture between The University of Gothenburg, department of psychology, The Royal Institute of Technology, Peking University and Stockholm University. <u>Max Rapp Ricciardi</u> designed and led the project and it was funded by Volvo Car Corporation. The study took part in Volvo Car Corporations sites in Chengdu and Shanghai and focused on the interaction between Swedish and Chinese managers.
2011-2012	Coaching Leadership in a Global setting: The research was conducted at Ericson BNET. The study was an evaluation study and a study of the personality of the Coaching Leaders at Ericsson. The sample consisted of approximately 1200 leaders who followed a Coaching leadership program in Sweden, Germany, Spain and Italy. A web based questionnaire was distributed to the participants. Field notes and observations were also conducted in about 10 training programs. Project Leader: Max Rapp Ricciardi.
2008-2010	Research Initiative on Multi-Projects Organizing and Communication. In collaboration with Chalmers University of Technology. Purpose and goal: The goals are: 1. to collaborate with practitioners to devise, test and evaluate practice-based processes and tools that enhance learning and competence development across disciplinary boundaries in teams and projects, and 2. to adapt and share the results across a wide range of workplaces. By examining the ways in which talk and action are negotiated to create and share individual and collective knowledge we intend to improve pro-

	cesses, interactions and relationships in different types of workplaces. Design and methods: A mix of quantitative (broad-based survey) and qualitative (multiple case studies) using a multi-mode model that ensures triangulation. The case studies follow an action-research-oriented approach following the typical intervention cycle: diagnosing – planning – action – evaluation.
2008	Leadership in the open Innovation paradigm: from R&D Management to Inter-Organizational Entrepreneurship? A joint venture with Max Rapp Ricciardi University of G U in collaboration with A sc. Professor. Matti Kaulio at the Royal Institute of Technology, Stockholm. A study that focused on identifying leadership challenges in Innovation driven companies who follows an Open Innovation Paradigm and R&D alliances.
